

# Intelicurve

Version 2

# Intelicurve

Intelicurve is a reporting tool that allows users to report billed data against national evaluation and management utilization data.

## Activation Options

When you start Intelicurve™, you will get the following Activation Screen.

Note: If you are running an activated copy, you will not get this screen.

## 30 Day Trial

If you are evaluating Intelicurve, you can activate your free 30 day trial by pressing **“Launch Program.”** This will run the Intelicurve program for 30 days. Each time Intelicurve is launched, a pop up will appear showing the number of days left on the evaluation license.

## Activating Intelicurve

To activate your Intelicurve license, click **“Phone Activation”** on the screen above. This will display the following screen.

After the screen appears, call Intelicurve at 1-800-786-4231. Any service representative will be able to assist you with the Phone Activation.

## Renewing Your Intelicurve License

Within 30 days of the Intelicurve License expiration, you will see a pop up stating how many days left on your license when Intelicurve is launched. To renew your license, select **"Phone Activation"** and call Intelicurve at 1-800-786-4231.

## Terms

**Billed Frequency** – the number of times a specific code was billed during the given data sampling

**Fee** – the fee associated with the CPT code

**Data Sampling** – the range of time for the billed frequency data

i.e. The billed frequency data ranges from January to August, select 8 months for the data sampling

# Using Intelicurve

## Entering Billed Frequencies

To enter in billed frequencies in the grid, select the appropriate code, clear out the billed frequency text box and enter in the new billed frequency. Pressing **“Enter”** will move to the CPT code below and automatically highlight the next billed frequency. To enter a billed frequency, just type the new billed frequency.

## Searching

There is a search box in Intelicurve to search through the CPT codes to find the appropriate one to enter a billed frequency. The Code text box can be typed in to search for a very specific code. The service type list can be used to find the first code in a group of service types. i.e. Selecting **Consultations** will select 99241 in the CPT code list as this is the beginning of the Consultation codes.

## Reporting

Selecting the **“Bar Graph”** and **“Line Graph”** options will print either a bar graph or a line graph on the report, respectively. You can print both on the same report.

The **“Report Providers from Selected Specialty (Criteria)”** option will pull all the physicians from the selected criteria. i.e. In integrated mode, selecting Cardiology specialty and choosing **“Report Providers From Selected Criteria”** will report all the providers that have Cardiology marked as their specialty.

If the **“Group by Provider”** option is selected, the Intelicurve report will show all the code groups together and show each provider with their own individual results. If this option is unselected, the report will display one set of results for each code group. To report on an entire specialty, select the specialty, and don't select **“Group by Provider.”** This will display the results for all the providers for the select specialty together. To report individual doctors under the selected specialty, select the **“Group by Provider”** option and this will display each doctor under the selected specialty with their individual results.

The **Print Options** allow you to select how the report will be viewed.

# Intelicurve Modes

There are two modes in Intelicurve. The first mode is a standalone application. The other option is Intelicurve integrated into Intelicode.

## Standalone Mode

To enter the standalone application, launch Intelicurve from the icon located on your desktop. In standalone mode, the **“Add Provider”** and **“Edit Provider”** buttons become available. To add a new provider, select **“Add Provider”** or to edit a provider select **“Edit Provider”** This will bring up the **Provider Maintenance** that is shown below.

### Intelicurve Standalone Mode

The screenshot shows the Intelicurve Standalone Mode interface. On the left is a table with three columns: Code, Fee, and Billed Frequency. The right-hand panel contains several sections for configuring reports.

Code	Fee	Billed Frequency
99201	\$55.65	650
99202	\$72.68	720
99203	\$85.64	850
99204	\$92.32	740

[Print Report] [Close]

To add or edit a provider, enter their name and select their specialty.

**Note:** The name cannot be blank and a Specialty must be selected.

Fees in the standalone application are entered manually. To enter a fee into the grid, select the appropriate code, clear out the fee text box and enter in the new fee. Pressing **“Enter”** will move to the CPT code below and automatically highlight the next fee. To enter a fee, just type the new fee.

Note: The **“Clear All Fees”** button will clear out all the fees entered into the grid.

## Integrated Mode

To enter integrated mode, inside of Intelicode is a menu option called Intelicurve. Select this menu option and then choose **“Launch Intelicurve.”**

In the integrated mode, Intelicurve will automatically include all the providers, fee schedules, and specialties including all the providers’ specialty and default fee schedule.
